Cyber Attack Report

Total Records: 11

Total Attacks: 11

Top Attack: BENIGN

Normal Traffic: 0

Attack Resolution Guide

BENIGN (3)

Description: Unrecognized attack detected.

1. Investigate manually.
2. Monitor network.
3. Update threat database.

BRUTE FORCE (2)

Description: Unrecognized attack detected.

1. Investigate manually.
2. Monitor network.
3. Update threat database.

DDOS (2)

Description: Attackers overwhelm your server/network with massive traffic, making services unavailable.

1. Identify attacking IPs via logs or monitoring tools.
2. Block offending IPs using firewall rules or network ACLs.
3. Implement rate limiting and traffic shaping on critical endpoints.
4. Deploy DDoS mitigation services (Cloudflare, Akamai, AWS Shield).
5. Monitor traffic continuously for recurring attacks.

PHISHING (2)

Description: Unrecognized attack detected.

1. Investigate manually.
2. Monitor network.
3. Update threat database.

WEBATTACK (2)

Description: Includes SQL Injection, XSS, CSRF, and other attacks targeting web apps.

1. Enable a Web Application Firewall (WAF).
2. Patch all web apps, frameworks, and plugins.
3. Sanitize and validate all user inputs.
4. Implement proper access control.
5. Educate staff on phishing/social engineering prevention.
